| <b>Type of Notification</b> | Corrigendum to Regular Notification |
| <b>Economic relevance</b>   | High                                |
| <b>Technical Relevance</b>  | Technical-Correction                |

**Proposal in brief**

- a. The US Department of Homeland Security issued a corrigendum to the final rule “Update to Electrical Engineering Regulations” published on 16 March 2023. The said final rule corrects the amendment and previous actions notified under the symbol G/TBT/N/USA/1725.
- b. Part 113- Communication and Alarm Systems and Equipment amended as follows:
  - a. In paragraphs (b) and (d), after the word “maker”, add the words “or initiating device”; and
  - b. In paragraph (g), remove the text “IEC 60529 (both incorporated by reference; see 46 CFR 110.10–1)” and add, in its place, the text “IEC 60529:2013 (both incorporated by reference; see § 110.10–1 of this subchapter).”
- c. The said correction shall be effective from 26 April 2023.

**Analysis**

- The said corrigendum is to correct the typographical error and hence does not seem to have any adverse effect on the stakeholders.
