

TSTLs designation applications are being invited for following network elements:

- With effect from 01-10-2022
  1. Access and Mobility Management Function (AMF) of 5G
  2. Authentication Server Function (AUSF) of 5G
  3. Non-3GPP Interworking Function (N3IWF) of 5G
  4. Network Exposure Function (NEF) of 5G
  5. Network Repository Function (NRF) of 5G
  6. Service Communication Proxy (SCP) of 5G
  7. Network Data Analytics Function (NWDAF) of 5G
  8. Session Management Function (SMF) of 5G
  9. Security Edge Protection Proxy (SEPP) of 5G
  10. Unified Data Management (UDM) of 5G
  11. User Plane Function (UPF) of 5G
  12. Private Automatic Branch Exchange (PABX)
  13. Optical Network Terminal (ONT) of PON family Broadband
  14. Optical Line Terminal (OLT) of PON family Broadband
  15. Transmission Terminal Equipment
  16. Cell Broadcast Centre (CBC)
  
- With effect from 01-08-2022
  1. S-Gateway (S-GW) of 4G
  2. Policy and Charging function (PCRF) of 4G
  3. Home Subscriber Server (HSS) of 4G
  4. Mobility Management Entity (MME) of 4G
  5. PACKET DATA NETWORK GATEWAY (P-GW/PDN GW) of 4G
  6. eNodeB of 4G
  
- With effect from 20-06-2022
  1. IP Router
  2. Wifi (CPE)- Modem
  3. Pluggable (U)ICC (SIM, USIM and other (U)ICC based applications/applets)
