Adoption of TSDSI Transposed 3GPP Release-17 Standards into National Standards by TEC

Telecommunications Standards Development Society, India (TSDSI), as a partner of 3GPP had submitted 3GPP Release 17 standard specifications [1], (total 1227 documents) to Telecommunication Engineering Centre (TEC) for adoption as National Standards.

These specifications have been processed for adoption as per the "Standardization Guide – A policy document for adoption of the domestic/international standards into national standards" notified as per O.M. No. 2-1/2018/SD/TSDSI/TEC/5 dated 8th May 2020. These standards were initially circulated to all the stakeholders for the public consultation. Then, a Consultative Committee (CC) on 3GPP Release-17 standard under chairmanship of DDG (MT), TEC and other members from Industry, academia, government, R&D organizations, SDOs etc. have examined the specifications w.r.t. public comments and inclusion of national requirements. Subsequently, Telecom Standards Advisory Committee (TSAC), has recommended adoption of 3GPP Release-17 standards as National Standard without any changes ("identical adoption").

Based on recommendation of TSAC Committee i.e. Apex Committee, TEC, DoT has approved adoption of these TSDSI transposed 3GPP Release-17 standards into National Standards without any changes ("identical adoption").
